

META'2020
International Conference on Metaheuristics and Nature Inspired Computing

27-31 Oct 2020
Marrakech, Morocco

<http://meta2020.sciencesconf.org/>

META is one of the main event focusing on the progress of the area of metaheuristics and their applications. As in previous editions, META'2020 will provide an opportunity to the international research community in metaheuristics to discuss recent research results, to develop new ideas and collaborations, and to meet old friends and make new ones in a friendly and relaxed atmosphere.

All selected long papers will be published in the Springer (SCOPUS, ISI, DBLP) conference proceedings. At least, 2 special special issues in ISI and SCOPUS journals are also confirmed.

META'2020 welcomes presentations that cover any aspects of metaheuristic research such as new algorithmic developments, high-impact applications, new research challenges, theoretical developments, implementation issues, and in-depth experimental studies. META'2020 strives for a high-quality program that will be completed by a number of invited talks, tutorials, workshops and special sessions.

The scope of the META'2020 conference includes, but is not limited to:

- * Local search, tabu search, simulated annealing, VNS, ILS, ...
- * Evolutionary algorithms, swarm optimization, bio-inspired algorithms, ...
- * Emergent nature inspired algorithms: quantum computing, artificial immune systems, bee colony, DNA computing, ...
- * Quantum computing
- * Parallel and distributed algorithms
- * Hybrid methods with machine learning, game theory, mathematical programming, constraint programming, co-evolutionary, ...
- * Application to: logistics and transportation, networks, scheduling, data mining, engineering design, energy, cloud, bio-medical, ...
- * Theory of metaheuristics, landscape analysis, convergence, problem difficulty, very large neighbourhoods, ...
- * Multi-objective optimization, bi-level optimization
- * Dynamic optimization, problems with uncertainty, ...
- * Parameter tuning (static, dynamic, adaptive, self-adaptive)
- * Hyper-heuristics, cross-domain metaheuristics
- * Software frameworks for metaheuristics and nature inspired computing

Submission of papers:

- Submission of papers via the website

S1) Short papers: Extended abstracts of work-in-progress and position papers of a maximum of 3 pages.

S2) Long papers: Original research contributions of a maximum of 10 pages.

S3) Journal papers: High-quality manuscripts that have recently, within the last year, been submitted or accepted for journal publication. For this special case, the submission should have the same title that the accepted work, the abstract AND the complete reference of the work.

- Proceedings of the conference will be provided. Selected papers of type S2 will be published in a Springer book (SCOPUS, ISI, DBLP).
- Predefined styles are available on the website <http://meta2020.sciencesconf.org/>
- Proposals for invited sessions, workshops and tutorials: Deadline 30th March 2020, contact meta2020@sciensesconf.org

Important dates

- Submission deadline: April 24, 2020
- Notification of acceptance: May 30, 2020
