ADVANCED PLANNING AND SCHEDULING (APS)

ABSTRACT: More or less what we all are doing at CIRRELT, GERAD and IVADO can be seen under one umbrella, when it comes to the business applications: advanced planning and scheduling (APS). In this informative talk, I will introduce APS, its modules and its interaction with enterprise resource planning (ERP) packages. Different aspects of employing APS in large organizations will be discussed together with steps to take for a successful implementation. Many examples from the industry will be reviewed to better position the importance of APS and the value it brings to the industry.

Note: Masoud Chitsaz is a PhD candidate at the Department of Logistics and Operations Management at HEC Montreal. His research is mainly focused on large-scale optimization of the integrated production, inventory, distribution and routing decisions through supply chains.

VENDREDI / FRIDAY

9 juin 2017, 12h
June 9nd, 2017, 12:00

Salle / Room 5441
Pavillon André-Aisenstadt
Université de Montréal

Pizza et boissons gazeuses fournies
Pizza and soft drinks offered

Réservé aux étudiants
For students only

Maximum : 25 participants

Inscription obligatoire au plus tard le 8 juin / Registration required no later than June 8th
