
CALL FOR PAPERS

ORAHS 2022: Operational Research Applied to Health Services

July 17-22, 2022, Bergamo, Italy

Conference website: <http://orahs2022.eu/>

ORAHS in the red zone

The EURO annual conference on Operations Research Applied to Health Services (ORAHS 2022) will take place in Bergamo, one of the Italian cities most heavily impacted by the COVID-19 pandemic. The conference will be mainly (but not exclusively) focused on the organization and reaction of health systems when confronted with emergency situations. It will be the first "back-to-normality" ORAHS edition, following the online-only ORAHS 2021 conference. The social program will be especially rich to make ORAHS 2022 a good opportunity for our community to revamp professional relationships and personal friendship.

Submission Guidelines

All attendees who wish to present their work at ORAHS 2022 must submit an abstract written in English and containing no more than 1500 characters (no formulae or mathematical notation are allowed). The submission must be done by the attendee who will present the work. All accepted abstracts will be published in the conference booklet. Each registration to the conference can be associated to at most one abstract.

In addition, attendees can also submit an extended version of their work to be considered for publication in a volume of the AIRO Springer Series.

Abstract submission is open through the EURO system. Detailed instructions and information about the extended abstract submission through the Springer procedure will be provided on the conference website.

Special issues on international journals dedicated to selected papers from the conference will be announced soon.

Submission deadlines

Deadline for submitting abstracts: April 30th, 2022

Deadline for submitting extended versions for the AIRO Springer Series proceedings: June 30th, 2022
