

## **CALL FOR PAPERS, INT'L JOURNAL OF ELECTRONIC BUSINESS (IJEB)**

### **SPECIAL ISSUE "INNOVATION IN AN OPEN WORLD"**

#### Description

The Internet pervades many of the activities of modern societies and has become the preferred medium for the delivery of information and services. The successful implementation of Internet applications, ranging from eBusiness, to eEducation or to eGovernment, is a multi-faceted problem, involving technological, managerial, economic, and legal issues.

The objectives of the International Journal of Electronic Business (IJEB) are to develop, promote and coordinate the development and practice of electronic business methods. In this special issue of the IJEB we wish to explore the many facets of Internet applications and technologies, with a focus on the technological, managerial, and organisational issues. Original and inter-disciplinary approaches to these problems are highly encouraged.

Authors focusing on the technological aspects are encouraged to highlight economic, managerial, or organizational implications of their work. Conversely, authors focusing on the economic, managerial, or organizational aspects are encouraged to highlight the technological dimension.

Papers will be evaluated on the basis of their 1) originality, 2) presentation, and 3) impact.
