Special Issue “New Business and Operational Models for the Management of Green and Sustainable City Logistics”

Journal: Sustainability (ISSN 2071-1050, IF 1.8)

Logistics is a key activity in Urban Areas, due to its key role in the economic growth of the city, but also to its externalities (e.g., traffic congestion, pollution, noise) affecting the quality of life of the citizens.

This Special Issue aims to focus on the new Business and Operational models emerging in planning and managing the city logistics while considering the environmental, social and economic aspects related to the sustainability of the logistic system.

Covered topics include (but are not limited to) Green Routing, Green Logistics, City Logistics Applications, Smart Mobility, Environment 4.0, Business Models in Urban Logistics, Synchronodal Transportation, Multimodal Transportation.

Manuscript Submission Information

Manuscripts should be submitted online at www.mdpi.com by registering and logging in to this website. Manuscripts can be submitted until the deadline. All papers will be peer-reviewed. **Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the special issue website.** Research articles, review articles as well as short communications are invited. For planned papers, a title and short abstract (about 100 words) can be sent to the Editorial Office for announcement on this website.

Submitted manuscripts should not have been published previously, nor be under consideration for publication elsewhere (except conference proceedings papers). All manuscripts are thoroughly refereed through a single-blind peer-review process. A guide for authors and other relevant information for submission of manuscripts is available on the Instructions for Authors page. Sustainability is an international peer-reviewed open access monthly journal published by MDPI.
