## CHALLENGES OF LOGISTICS

**Abstract:** The challenges of logistics are changing. We will focus on the environment how to use and reuse materials, reverse logistics in retailing and other logistics sector, door-to-door delivery of local produced food which is one of the most important issue in European Union. Tourism in Slovenia is increasing and we will focus on logistics and reasons of becoming Sevnica as a small city such a touristic attraction.

**Bio:** Andrej Lisec is an associate professor in the logistics, reverse logistics and sustainability fields and a researcher. He has been involved in the coordination and implementation of several international and national projects, focusing on sustainability, reduction of logistics cost and environment. Currently, he is a member of the expert group by the European Commission in the field Smart, green and integrated transport for the H2020 in the Member States; he is in the Expert group for the Strategic Transport Research and Innovation Agenda (STRIA) governance. He has many international experiences and has been studying and working in numerous institutions across Europe. He was studying at University of Viadrina, Germany. During his projects work, he has been collaborating with various international partners, including academia and companies. Among these collaboration, he was the coordinator for project Complete - "Establishment of Centers for Competence and Employability Development" in Erasmus + for Slovenia and coordinator of the bilateral project with Széchenyi István University, Hungary, Green and lean strategies in the automotive industry by entering the 4th industrial revolution. Until now, he has published more than 300 bibliographic units, including papers, conference proceedings, and chapters in monographs.
